VANGUARD DIAGNOSTICS

Advanced

3 - Part Hematology Analyzer

VANALYZE® - V30 Pro

- Absolute Neutrophil Counts
- Neutrophil Lymphocyte Ratio
- Platelet Lymphocyte Ratio

More clinical insight from every CBC

24 - Parameter CBC Reporting with ANC, NLR & PLR

For sharper Infection - risk, Neutropenia and Inflammation Asssessment from Routine Hematology

Beyond a routine count, the VANALYZE - V30 Pro derives three clinically meaningful indicators - delivering 5-part-like interpretive value within an efficient 3-part workflow.

ANC

Absolute Neutrophil Count

Clearer infection-risk assessment, at a glance

- Delivers Absolute Neutrophil Count alongside routine CBC parameters.
- Helps clinicians assess immune status and infection-risk with confidence.
- Supports Neutropenia screening and therapy monitoring.

Infection risk · Neutropenia screening · Therapy monitoring

NLR

Neutrophils ÷ Lymphocytes

A window on systemic inflammation

- NLR reflects the balance between neutrophil-driven inflammation and the lymphocyte-related immune response.
- A raised NLR may indicate that the body is under inflammatory, infectious, physiological stress.

Systemic inflammation

PLR

Platelets ÷ Lymphocytes

Added inflammatory & immune-status insight

- PLR relates platelet activity which may rise in inflammation to lymphocyte status - a marker of immune balance.
- It adds information beyond platelet count alone, supporting broader interpretation from routine hematology testing.

Inflammatory & Immune balance

***NLR and PLR are reported as Research-Use-Only (RUO) parameters.**

Count with Clinical Confidence

Smarter differentiation - Leaner workflow

A robust 3-part affordable analyzer engineered for quality-focused laboratories. Reliable hardware and an improved fluidic system that reduce reagent consumption while widening clinical capability.

01

Adaptive Threshold Technology

- Adaptive thresholding differentiates WBC, RBC and PLT with better accuracy.
- Smarter discrimination than a basic 3-part analyzer.

Accurate WBC / RBC / PLT differentiation

02

Only two reagents

- Two reagents for sample analysis.
- Up to 120 days on-board stability
- Low consumption, efficiency and ease.

Up to 120-days on-board stability

03

Wider linearity, reliable precision

- An extended linearity range for WBC and PLT with dependable precision.
- Designed to support diversified clinical cases with consistent CBC results.

Reliable across diverse cases

04

Low sample volume

- Only 10 µL of whole blood per test.
- Well suited to pediatric and difficult draw patients.

10 µL per test

Technical specifications

Parameters

- **21 Reportable Parameters:** WBC, LYM%, MXD%, NEUT%, LYM#, MXD#, NEUT#, RBC, HGB, HCT, MCV, MCH, MCHC, RDW-CV, RDW-SD, PLT, MPV, PDW, PCT, PLCC, PLCR
- **2 RUO Parameters:** NLR, PLR
- **3 Histograms:** WBC, RBC, PLT

Performace

Parameter	Linearity	Precision (CV%)
WBC (10^9/L)	0.0–300	≤2.5% (3.50–15.00)
RBC (10^{12}/L)	0.0–8.5	≤1.5%(3.5-6.5)
HGB (g/L)	0–250	≤1.5%(100-180)
PLT (10^9/L)	0–4000	≤5.0% (125-500)
MCV (fL)		≤1.0% (70.0-120.0)
HCT(%)		≤2.0% (30-50)

Measurement Principles

WBC / RBC / PLT	Direct impedance method
Hemoglobin	Cyanide-free lyse reagent

Sample Volume

Whole blood	10 µL
Capillary whole blood	10 µL
Pre-diluted	20 µL

Throughput & Reagents

Throughput	60 samples / hour
VANSCAN Diluent	20 L
VANSCAN Lyse	500 mL
VANSCAN Cleaner	50 mL
Controls / Calibrator	D-Check-D [L,N,H]

Operation & Connectivity

Display	10.4-inch TFT colour touch screen
Sample ID	Handheld barcode scanner
Reagent mgmt	RFID transducer
Printing	Built-in thermal printer
LIS	Bidirectional, HL7
Peripherals	5 USB ports(external printer, software upgrade, barcode scanner, keyboard, mouse), 1 LAN port

Data Storage

Results	100,000 including histograms
QC files	60 files (100 data / file)

Enviornment & Physical

Temperature	15°C – 35°C
Humidity	20% – 85% RH
Air pressure	70 kPa – 106 kPa
Dimensions	415 (L) × 275 (W) × 406 (H) mm
Weight	18 Kg
